Response to Amendment

This Office Action is in response to a communication received on December 1, 2005.

The Information Disclosure Statements received May 10, 2004, September 24, 2004, May 1, 2006, and May 11, 2006 have been considered.

Claims 1, 3, 5, 7, 9, 11, 13, 14, 24, 25, 41, 42, 58, 59 have been amended.

Claims 19, 20, 36, 37, 53, 54 have been cancelled.

Claims 1-18, 21-35, 38-52, and 55-65 are pending in this application.

Reason for Allowance

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the examiner has found that the prior art of record does not teach or suggest or render obvious a method, apparatus, device, or computer readable medium for using a router to mark a data flow with a first behavior value determining the achieved flow then marking the data flow with a second behavior value. More specifically, the prior art does not disclose or teach a network which receives a data flow through a router, having the router mark the data flow with a first behavior value. Then monitoring the achieved data flow and packet flow characteristics in the network and using those values to decide a new behavior value for a router in the system to later mark the data flow with which makes the network treat the data flow in a different manner from the first behavior value. Then continuing to repeat this process as the data flow continues in the network at each hop. These differences are present in

the specification and are included in the independent claims 1, 5, 9, 13-14, 24-25, 41-42, and 58-59.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent No. 6826147 issued to Nandy, because it discloses monitoring achieved data flow in a differentiated services system.

U. S. Patent No. 6028842 issued to Chapman, because it discloses dynamically changing packet classifications based up monitored data.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Bates whose telephone number is (571) 272-3980. The examiner can normally be reached on 8 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saleh Najjar can be reached on (571) 272-4006. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
